ENVy is a self-etch, self-adhesive, dual cured resin cement. This user-friendly cement is ideal for restorations made of zirconium oxide, lithium disilicate, other metal-ceramics and for the cementation of high-strength restoratives on implant abutments.

**Feature**
- New adhesion promoter technology ensure high retention on multiple surfaces
- Superior Hydrolytic Stability
- Numerous Restoration uses Without Bonding
- Color Fast Proprietary Initiator System
- Patient Friendly Self Adhesive Chemistry
- “Tack and Wave” Chemistry
- Minimal Oxygen Inhibition
- Time-saving Technique
- Stable Material Properties
- Mixes quickly, Dual cured

**Benefits**
- Flexible use, high retention of enamel, dentin, porcelain fused to metal (PFM), zirconia, lithium disilicate, gold, etc.
- Ensures high retention over extended time periods
- Use for inlays, onlays, crowns, bridges, and fiber post cementation
- Color stability to extend the life of your esthetic restoration
- Virtually no post-op sensitivity
- Enables restorations to be initially light-cured into place to establish a “semi-gel” state for spot-tacking into place and easy cleaning of the margins
- Ensures curing stability of material
- No etching, priming or bonding - Saves you time and money
- No refrigeration needed, long shelf life
- Simple, single step cementation

Includes: 9 gm Auto Mix Syringe, 10 Large Mixing Tips, 6 Intracanal tips. See back for details.
ENVY Cement

**ENVY-**
*A New Advancement in Adhesive Technology:*

- Highest adhesion available
- Simple, cost effective, one step solution
- No etching, priming or bonding
- pH neutral and hydrophobic for long lasting stability
- Color stable and stain resistant
- High radiopacity
- Virtually no post-op sensitivity
- No preconditioning needed to helping to eliminate variability
- Easy removal of excess
- Convenient automix
- Translucent for all your esthetic needs
- Wider tip for crown application and intra-canal tip for endodontic cavity and inter-oral application.

**ENVY outperforms other self-etch, self-adhesive resin cements**

Shear Bond Strength (without bonding)

The stability of ENVY cement is enhanced by its ability to quickly become pH neutral and hydrophobic.

**ORDERING INFORMATION**

**ENVY Cement:**
- 960-00: Translucent Shade: 9gm Auto Mix Syringe, 10 Large Mixing Tips, 6 Intracanal tips

**Mixing Tip Refills**
- 870-20: 20 - Intracanal tips
- 1628-20: 20 - Large Mixing Tips
